

ST. MARY'S COUNTY BOARD OF APPEALS

In the Matter of Verizon Wireless
24337 Hollywood Road
Hollywood, Maryland

Case No. CUAP # 14-135-0005

DECISION AND ORDER**Introduction**

Verizon Wireless (hereinafter "Applicant") filed an application for a conditional use permit pursuant to Chapter 25 of the St. Mary's County Comprehensive Zoning Ordinance (hereinafter the "Ordinance") regarding property located at 24337 Hollywood Road, Hollywood Maryland (hereinafter the "Property").

After due notice, a public hearing was held at 6:30 p.m. on November 12, 2015, at the St. Mary's County Governmental Center at 41770 Baldrige Street in Leonardtown, Maryland. All persons desiring to be heard were heard after being duly sworn and documentary evidence was received. The proceedings were recorded electronically.

Legal Standard

The Board shall not approve a conditional use unless it finds, based on the evidence, that:

1. The conditional use complies with the standards of the district in which it is to be located and standards applicable to that use;
2. The establishment, maintenance, and operation of the conditional use will not be detrimental to or endanger the public health, safety, convenience, morals, order, or general welfare;
3. The conditional use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, and will not substantially diminish or impair property values within the neighborhood;
4. The proposed use at the proposed location will not have adverse effects above and beyond those inherently associated with the proposed use irrespective of its location within the zoning district;
5. Adequate utilities, access roads, drainage, and/or necessary facilities have been or are being provided;
6. Adequate measures have been or will be taken to provide ingress and egress following a design that minimizes traffic congestion in the public streets;

CUAP #14-135-005, Verizon Wireless
24337 Hollywood Road, Hollywood, Maryland

7. The proposed conditional use is not contrary to the goals, objectives, and policies of the Comprehensive Plan; and
8. The conditional use shall, in all other respects, conform to the applicable regulations of the district in which it is located or to the special requirements established for the specific conditional use in Chapter 51.

Findings of Fact

The Property is the site of Dorsey Park, a County-owned park containing athletic fields, a basketball court, playground, and two parking lots. The perimeter of the Property is wooded. The Applicant proposes to construct a monopole-style commercial communication tower on the northeast corner of the Property, at an elevation of one hundred twenty-five (125) feet above ground level. The tower will be located approximately one hundred twenty-nine (129) feet from the Property's northeast boundary, which will be the tower's closest point to any shared property line.

The Tower will be constructed within a gravel lease area measuring fifty feet by fifty feet (50 x 50), or two thousand five hundred (2,500) square feet. The lease area will be enclosed by a seven (7)-foot high chain link fence, which will be topped by one (1) vertical foot of barbed wire. The lease area will be surrounded on three (3) sides by the existing mature woods. The woods are dense and provide a natural buffer between the tower and the athletic fields and between the tower and the adjoining properties. The tower's design and structural capacity will support three (3) service providers, including the Applicant.

The Applicant plans to construct a ten (10)-foot wide gravel driveway off Hillcrest Drive, which will end in a twelve (12)-foot wide T-turn-around, to serve the tower facility. Hillcrest Drive is a private right-of-way, and the Applicant has obtained an easement from the owner to use the right-of-way.

Traffic to the tower will be minimal once construction has been completed. Any equipment problem can be handled remotely. On average, one (1) or two (2) site visits per month may occur.

Drainage will be addressed through the site plan process and in accordance with stormwater management and erosion and sediment control requirements.

Additional specific findings of fact are as follows:

1. There is a gap in the coverage provided by existing towers in the geographic area to be served by the proposed tower.
2. The proposed tower would provide coverage in the geographic area for which coverage is not provided by existing towers.

CUAP #14-135-005, Verizon Wireless
24337 Hollywood Road, Hollywood, Maryland

3. The RF Report containing the information required by Article 5, Section 91.b. (1) (a) through 91.b. (1) (d) of the St. Mary's Comprehensive Zoning Ordinance was submitted by the Applicant.
4. A detailed engineering analysis of the proposed new tower which included a summary of the proposed tower's capacity to provide space for future co-location by others was provided.
5. The specific type of tower to be constructed and the proposed materials to be used in the construction of the tower were identified.
6. The design of the proposed tower has been sealed by a licensed engineer licensed to practice in the State of Maryland.
7. All noise, odor, and other potential nuisance producing facilities, appurtenances and/or outbuildings, or the like, that are associated with the proposed use were identified.
8. The maximum number of antennae and co-location spaces that can safely be placed on the tower were identified. An engineering statement was submitted that the proposed tower can accommodate a minimum of three (3) users.
9. An elevation drawing depicting the tower at its proposed height with all the planned antennae shown was submitted.
10. A visual impact study, which included photo-simulations, and the results of a balloon test were submitted.
11. An engineering statement prepared by a licensed professional engineer certifying the proposed facility will meet or exceed all regulatory emission standards established by the FCC and which identified the predicted exposure for the specific equipment proposed along with the allowable federal limit of exposure was provided.
12. An engineering statement prepared by a licensed professional engineer describing the contained fall design of the tower in the event of a structural failure was provided.
13. Evidence that at least one telecommunications carrier has agreed to locate antennae on the tower was provided.
14. Co-location on existing commercial towers, public safety towers, or other appropriate structures is not feasible.
15. No existing or proposed tower can be structurally modified to meet the applicant's needs.
16. The proposed site results in fewer or less severe impacts than any feasible alternative site.

17. The tower is being constructed at the minimum height to obtain reasonable signal coverage.
18. The site is large enough to accommodate the tower and all related structures, equipment and appurtenances.
19. The concept site plan depicts the tower site, the location of all structures, equipment and appurtenances to be installed with the tower, all existing tree buffers on the subject property, all adjoining properties, means of ingress/egress and all required setback lines.
20. The required setbacks have been met.
21. No construction is being done within the Critical Areas.

Conclusions of Law

The gap in coverage necessitates additional facilities. The proposed tower does not present issues of adequate public facilities, traffic or public safety. There was no evidence that the proposed tower would substantially diminish or impair property values within the neighborhood. There is no practical alternative site on which to locate facilities to remediate the gap in coverage. The proposed use at the proposed location will not have adverse effects above and beyond those inherently associated with the proposed use irrespective of its location.

Based on the evidence set forth in the Findings of Fact, the proposed tower meets the general standards for a conditional use and the specific standards set forth in Section 51.3.91 of the Ordinance, subject to the conditions set forth below.

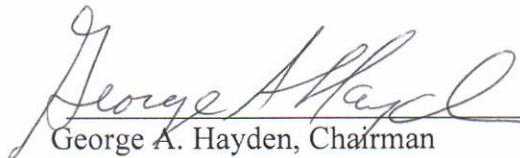

ORDER

NOW, THEREFORE, BE IT ORDERED, that having made a finding that the standards for conditional use and the objectives of Section 25.6 of the St. Mary's County Comprehensive Zoning Ordinance have been met, a conditional use to construct the proposed commercial communications tower on the Property is **approved subject to the following conditions** and that the Chair be authorized to sign an order approved for form and legal sufficiency by counsel and reflecting the Board's decision in the absence of objection by any Board member after distribution and review of the proposed order:

1. The tower shall be constructed so as to provide adequate capacity for future co-location of other commercial and, or, government operated antennae. The system design plan shall delineate areas near the base of the tower to be used for the placement of additional equipment buildings for other users.
2. No signals, lights, or illumination shall be permitted unless required by the Federal Communications Commission, The Federal Aviation Administration, or the County.
3. No commercial advertising or other language shall be permitted on the tower.

4. All obsolete or unused facilities, including buildings, towers, and all other improvements associated with the tower, shall automatically be deemed abandoned upon twenty-four (24) months of continuous cessation of operations and shall be removed t such time without cost to the County. The Applicant shall provide a bond, letter of credit, or other appropriate surety at time of approval as approved by the County to cover the cost for demolition of the facility and site restoration.
5. Contact information shall be prominently displayed on the fence enclosing each facility. This information shall be current and shall identify the company name, responsible individual, and phone number for the contact person.
6. Final site plan approval is required with the condition that the fall zone to the ball field goal post must be at least one hundred thirty-five (135) feet.

Date:

George A. Hayden, Chairman 12/15/15

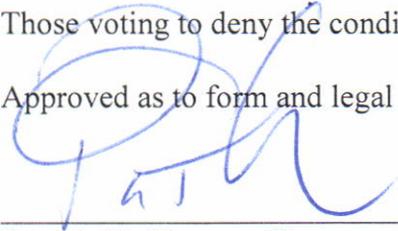

Those voting to approve the conditional use:

Messrs. Hayden, Miedinzki, Greene,
Payne, and Brown

Those voting to deny the conditional use:

None

Approved as to form and legal sufficiency:

12/21/15
Patrick W. Thomas, Esq.,
Special Counsel to the Board
