St. Mary's (County of) MD

Update to credit analysis

Summary

[St. Mary's County](#) (Aa1) benefits from a local economy that is anchored by the Naval Air Station Patuxent River (NAS Pax River), the navy's center for avionics research and development, testing, evaluation, and acquisition. The base hosts the Naval Air Systems Command and Naval Air Warfare Center Aircraft Division, and its presence attracts high-paying technology industry to the area. As such, wealth and income levels are strong, and support the county's solid and improving financial position.

As heightened economic activity spurs population growth, additional infrastructure investment, particularly for the schools, public facilities, and roads is becoming increasingly important. Because of management's plans to address capital needs with more debt and less pay-go funding, St. Mary's County's debt burden will increase. However, it will likely remain manageable given the modest level of debt outstanding as well as overall low fixed costs.

Credit strengths

- » Sizeable and stable tax base anchored by NAS Pax River
- » Above-average wealth and income levels
- » Formal fiscal policies
- » Low debt and pension burdens

Credit challenges

- » Local economy and employment vulnerable to federal military cuts
- » Reliance on economically sensitive revenues
- » Coastal location susceptible to weather-related events

Rating outlook

Outlooks are generally not assigned to local governments with this amount of debt outstanding.

Factors that could lead to an upgrade

- » Significant and sustained increase in reserves and liquidity
- » Material tax base growth

Factors that could lead to a downgrade

- » Trend of structural imbalance yielding diminished reserve levels
- » Deterioration of tax base and socioeconomic profile

Profile

St. Mary's County covers an area of 764 square miles and is located on a peninsula in southern [Maryland](#) (Aaa stable) with over 500 miles of shoreline. The county has a population of approximately 114,000.

Detailed credit considerations

Economy and tax base: technology-based local economy anchored by a major naval base

St. Mary's County's tax base will likely continue to grow given the strong technology sector anchored by NAS Pax River, which is the county's largest employer with approximately 20,200 employees. Further, the local economy is well diversified and includes tourism, healthcare, higher education, and advanced manufacturing. Ongoing development drove a five-year average annual tax base increase of 1.9%, reaching \$13.6 billion in fiscal 2022. The county's tax base expanded steadily over the last ten years, anchored by military presence, though remains below the median for Aa1-rated counties nationally (full value of \$24.2 billion).

Given the number of high-paying technology-based jobs in the county, resident wealth levels continue to rise. The median family income is above average at 139.5% of the US median, and full value per capita is a strong \$112,427, which exceeds the median (\$110,110) of similar-rated counties. The February 2021 unemployment rate of 4.4% is below the state (6%) and nation (7%) for the same period.

Besides the naval base, other large private employers include MedStar St. Mary's hospital and a number defense contractors. Although the large amount of defense-related employers leaves the county vulnerable to federal military cuts, NAS Pax River has not

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

experienced major cuts, likely because of its role as a strategic research base, and, given the US government's commitment to defense spending.

Financial operations and reserves: healthy and improving reserves and liquidity

The county's financial position will likely remain stable due to long-term financial planning and adherence to formal fiscal policies. The fiscal 2021 budget represents a .04% increase over fiscal 2020. The budget has allocated use of fund balance of \$4.9 million; the majority of these monies assigned for one time capital improvement project expenses. The county maintains conservative budgeting assumptions, and year-end figures generally exceed budgetary expectations.

Fiscal 2020 ended with a general fund balance of \$63.4 million (25.6% of revenues), which was consistent with projections. The county's reserves remain below the US median for Aa1-counties nationally (34%). Since May of 2020 the county has received \$22.2 million in total grant funding for coronavirus relief.

Property taxes are the main source of revenues at 45.7%, and have been growing as a result of the county's increasing assessed value. Economically sensitive income taxes are the second largest source of operating revenues at 43.3%. The local income tax rate was raised to 3.17% in January 2020 from 3.0% in fiscal 2019, and remains slightly below the cap of 3.2%, which affords the county future operating flexibility.

Liquidity

General fund net cash at the end of fiscal 2020 is strong at \$121.4 million, or 49% of general fund revenues, and exceeds fund balance because the county pools its cash in the general fund. This level is well above the national Aa1 median (39% of revenues).

Debt and pensions: debt burden that will remain manageable despite additional issuances

The county's debt burden will increase in the next five years given additional debt plans, however, it will remain manageable due to the currently modest level of debt outstanding and above-average principal amortization. Post-issuance of the Series 2021 bonds, the county will have net direct debt of \$139.6 million, which is a manageable 1.1% of full value. Because counties in Maryland issue bonds for schools, this figure is slightly above the median for Aa1-rated counties nationally (0.6% of full value), yet it remains below the median for counties in the state.

The county's 2021-2026 capital improvement plan (CIP) totals \$368 million, and largely supports public facilities (26%), public schools (25%), and highways (18%). The plan will be funded by bonds (52%), with a portion funded by state and federal grants (31%).

Legal security

The 2021 bonds are secured by the county's absolute and unconditional ad valorem tax pledge.

Debt structure

All of the county's debt is fixed rate, and amortization of debt is average with 65% of principal retired in 10 years. Fiscal 2020 debt service accounted for approximately 5.3% of general fund expenditures.

Debt-related derivatives

The county is not a party to any derivative agreements.

Pensions and OPEB

Pensions are not a source of credit pressure for the county. As of fiscal 2020, the county's (including its component units) adjusted net pension liabilities (ANPL), based on a 3.05% discount rate, totaled \$337.1 billion. The ANPL represents a manageable 1.36 times operating revenue and 2.62% of full value.

In fiscal 2020, the county contributed \$17.3 million to the plans, which represents 145% of its "tread water indicator."¹

The county also provides other post-employment benefits (OPEB) to employees (and the school system employees). Overall, total fixed costs (debt service, pension tread water, and OPEB costs) represented a manageable 15.2% of operating revenues in fiscal 2020.

Exhibit 2

Pension Dashboard

\$ thousands	2018	2019	2020
Net direct debt	\$79,580	\$98,318	\$118,315

ESG considerations**Environmental**

The county's [exposure to long-term environmental trends](#) is consistent with that of the US local government sector, which as a whole, is low. Environmental considerations are, however, material to the county's credit profile given its coastal location. According to data from Moody's affiliate Four Twenty Seven, the county has elevated exposure to water stress and extreme weather events, which is notable given that the region is an economic engine for the region with the naval base. Still, the county's operations and economy will likely be able to withstand weather-related events given the state and federal governments' history of providing disaster relief to local governments following a major weather event.

Social

Social issues, [which include demographics, labor force, and income metrics](#), are material to the county's credit quality and are incorporated by way of full value per capita and median family income. While social issues do not currently pose a credit risk, we will continue to monitor a variety of factors such as demographics, income levels, population trends and employment levels, as these remain important key credit metrics.

Governance

[Like issuers across every sector](#), governance considerations are material to the county's credit quality. St. Mary's County will continue to benefit from strong management, conservative budgeting practices, and adherence to multiple formal fiscal policies. The county has a policy to maintain fund balance of 15% of general fund revenues, inclusive of a "bond rating reserve" at 6% of revenues, a "rainy day fund" at \$1.6 million, and the unassigned fund balance. Debt policies include limits on total debt at 2.15% of assessed value, and annual debt service at 10% of the general fund budget.

Maryland Counties have an Institutional Framework score of Aa, which is high compared to the nation. Institutional Framework scores measure a sector's legal ability to increase revenues and decrease expenditures. While the sector's largest revenue source, property taxes, is not subject to any statewide caps, income taxes account for approximately a third of revenues and are capped at 3.2%.

Unpredictable revenue fluctuations tend to be minor, or under 5% annually. Across the sector, fixed and mandated costs are generally greater than 25% of expenditures. Maryland has public sector unions, which can limit the ability to cut expenditures. Unpredictable expenditure fluctuations tend to be minor, under 5% annually.

Rating methodology and scorecard factors

The US Local Government General Obligation Debt methodology includes a scorecard, a tool providing a composite score of a local government's credit profile based on the weighted factors we consider most important, universal and measurable, as well as possible notching factors dependent on individual credit strengths and weaknesses. Its purpose is not to determine the final rating, but rather to provide a standard platform from which to analyze and compare local government credits.

Exhibit 3

Rating Factors	Measure	Score
Economy/Tax Base (30%)[1]		
Tax Base Size: Full Value (in 000s)	\$13,200,508	Aaa
Full Value Per Capita	\$117,557	Aa
Median Family Income (% of US Median)	139.5%	Aa
Finances (30%)		
Fund Balance as a % of Revenues	25.6%	Aa
5-Year Dollar Change in Fund Balance as % of Revenues	7.6%	A
Cash Balance as a % of Revenues	49.0%	Aaa
5-Year Dollar Change in Cash Balance as % of Revenues	19.5%	Aa
Management (20%)		
Institutional Framework	Aa	Aa
Operating History: 5-Year Average of Operating Revenues / Operating Expenditures	1.0x	A
Debt and Pensions (20%)		
Net Direct Debt / Full Value (%)	0.9%	Aa
Net Direct Debt / Operating Revenues (x)	0.5x	Aa
3-Year Average of Moody's Adjusted Net Pension Liability / Full Value (%)	2.0%	A

Endnotes

1 Our "tread water" indicator measures the annual government contribution required to prevent reported net pension liabilities from growing, given the entity's actuarial assumptions. An annual government contribution that treads water equals the sum of employer service cost and interest on the reported net pension liability at the start of the fiscal year. A pension plan that receives an employer contribution equal to the tread water indicator will end the year with an unchanged net pension liability relative to the beginning of the year if all plan assumptions hold. Net liabilities may decrease or increase in a given year due to factors other than the contribution amount, such as investment performance that exceeds or falls short of a plan's assumed rate of return. Still, higher contributions will always reduce unfunded liabilities faster, or will allow unfunded liabilities to grow more slowly than lower contributions
