There is known historic significance at this location, as shown in SM-252. There are no known recorded archeological sites at this location.

The primary structure built in 2024 is the house on the property. The barn that is being replaced showed up on GIS between 1973-1980, but the exact year it was built is unknown.

The barn being replaced does not appear to be the one referenced in SM-252 as the location is different (*see attachment RESACC26-2003 MEDUSA Print Out*).

When staff went out to take photographs of the barn, the structure was no longer on the property.
